

# Patricio “Pato” Lankenau

## WORK EXPERIENCE

MAY 2014 – AUGUST 2014

Google

### *Software Engineer Intern*

Worked on Google Play Games. Main responsibility was to re-write the Java backend implementation for handling of achievements, and to write implementations for adding more levels to Google Play Games profile. This included writing a large-scale map reduce pipeline to refill any due level ups for 150+ million players across Android, iOS, Native, and Web.

AUGUST 2013 – MARCH 2014

PayOnDelivery, Inc

### *Web Developer*

Worked as one of the main developers, worked on web and API development using JavaScript, HTML5, CSS3, and PHP5.

JUNE 2013 – AUGUST 2013

RedPill Consulting

### *Full-stack Developer*

Designed and developed a responsive survey used to collect data from the clients of RedPill Consulting. Included a back-end system for processing, analyzing, and reporting data using PHP5.

MARCH 2013 – JUNE 2013

CargoGroup

### *Independent Developer*

Developed a mobile web application that is used to keep track of expenses, salaries, and profits. In addition to an HTML5 web app, there is a desktop interface which can be used to generate reports, and monitor activity.

DECEMBER 2012 – FEBRUARY 2013

RedPill Consulting

### *Software Developer*

Developed a corporate Java application which is used to view, edit, and create multi-dimensional spreadsheets. It is a fully functional editor with live-editing of data and includes various customized versions for clients and with different functionality.

JULY 2012 – JANUARY 2013

Baker Hughes

### *Software Developer*

Designed and developed a system to keep track of efficiency and production across the factory floor. It keeps track of productivity in real-time, and generates supervisor reports. It was later expanded to two more plants.

## EDUCATION

2013–2017    **University of Texas at Austin**  
**TURING SCHOLAR 3.7 GPA**  
*B.S. in Computer Science*

## SOFTWARE SKILLS

PROFICIENT    Java, PHP, C, C++, HTML5, CSS3, JavaScript

WORKED IN    Python, MySQL, Golang, MongoDB, GAE

## CLASSES

CS439H    Operating Systems: Honors  
CS429H    Computer Architecture: Honors  
CS314H    Data Structures: Honors  
CS378    Autono Itellgnt Robotcs - Research  
CS311H    Discrete Mathematics CS: Honors  
M427LH    Vector Calculus: Honors  
M340L    Matrices and Matrix Calculations  
M427KH    Differential Equations: Honors

## PROJECTS

- Built a quadcopter from parts, 4kg carrying capacity, self-stabilization
- Application to view and analyze 170,000+ reviews for Google Play Games app, including concept and sentiment analysis
- LED Status indicator for my door written in C and deployed using an atmega avr
- Web service to cryptographically and securely timestamp information and files
- Mechanism to unlock dorm door using a phone app with a servo and RaspberryPi
- Android app to “drop” pictures in geolocation that can be opened publicly
- Created a clock and email checker using Python and a RaspberryPi
- Created gaming site for my high school that averaged 50,000 page views a day
- Developed and sold over 4000 copies of my Farmville bot
- Other projects: Image manipulation, Conway’s Game of Life, Tetris AI, Markov chains, tone matrix, multiplayer turn-based rpg
